Mobile Computing COMP3011J
Assignment – 1

Instructions for Recording the Video

1. **Introduction**. Start by briefly introducing your app. You can mention the assignment requirements you fulfilled.
2. **App Tour**.
    - **Email Composition**. Show the email composition screen, highlight the input fields ('from', 'to', 'cc', 'bcc', etc.), and demonstrate the Clear and Preview buttons.
    - **Email Reading**. Switch to the email reading screen using the Preview button, showing how the email is displayed. Ensure the view is scrollable if the email content is large.
    - **Data Preservation**. Show that if the app restarts or the user switches between activities, the data is preserved.
3. **Optional Features**. If you implemented the Send button or any extra features, demonstrate them briefly.
4. **Video Tips**.
    - **Speed Up**. Feel free to speed up non-essential parts of the video (e.g., typing in fields) to fit within 1 minute.
    - **Narration/Captions**. You can include a voiceover or add captions to explain your app's features and functionality.
5. **Video Format**. Submit the video in MP4 (preferred) or MOV format.

Make sure your video is concise and covers all the key aspects of the assignment.
